

Track and Trace Requirements for Staying on the CL Site

As a CL Site we are required by the government to log individual names of all people on the CL site at any moment in time. We are required to keep this information for 21 days as it will be linked in with the government track and trace system.

To keep in line with data protection we have decided that the best way to do so is for you to complete a short track and trace form before arrival at the park detailing each individual's contact number and email address. If this changes before or during your stay you are required to let us know the new details of any person staying on the site.

The form can be accessed via the link below. This will also be sent via email to you a week before your arrival. To ensure we meet government guidelines you will not be permitted to enter the site until this form has been completed.
